

Fund Update

For the quarter ended 30 June 2026

- **Aurora KiwiSaver Scheme***
- **Aurora Liquidity Fund***

This fund update was first made publicly available on: 29 July 2026.

***Note:** On 24 July 2026, the scheme name changed to Hive KiwiSaver Scheme and the fund name changed to Hive Aurora Liquidity Fund. Both name changes will be reflected in future fund updates.

What is the purpose of this update?

This document tells you how the Aurora Liquidity Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Hive Funds Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

Objective: To provide a gross return above the return of the Bloomberg NZBond Bank Bill Index on a rolling 12-month basis.

Strategy: Provides exposure to an actively managed portfolio of bank bills, floating rate notes and mainly short-term deposits and securities, that targets capital security and liquidity.

Total value of the fund	\$45,104,904.78
The date the fund started	13 May 2022
Number of members in the fund	3,715

What are the risks of investing?

Risk indicator for the Aurora Liquidity Fund:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating. This risk indicator is not a guarantee of a fund's future performance.

The risk indicator is based on the returns data for 5 years to 30 June 2026¹. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates. See the product disclosure statement (**PDS**) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	1.93%
Annual return (after deductions for charges but before tax)	2.71%
Market index annual return (reflects no deduction for charges and tax)	2.79%

The market index return is Bloomberg NZBond Bank Bill Index.

Additional information about the market index is available on the offer register at disclose-register.companiesoffice.govt.nz.

Annual Return Graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 30 June 2026.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower. The market index return reflects no deduction for charges and tax.

What fees are investors charged?

Investors in the Aurora Liquidity Fund are charged fund charges. In the year to 31 March 2026 these were:

Total fund charges	% of net asset value (inc. GST)
Total fund charges	0.40%*
Which are made up of:	
Total manager and admin charges (inc. GST)	0.40%*
Including:	
Manager's basic fee (inc. GST)	0.27%
Other management and administration charges	0.13%*
Other charges	Dollar amount per investor
Member fee	\$36.00

**These amounts are estimated.²*

See the PDS for the scheme for more information about these fees. This can be accessed from disclose-register.companiesoffice.govt.nz.

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Anthony had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Anthony received a return after fund charges were deducted of \$271 (that is 2.71% of his initial \$10,000). Anthony also paid \$36 in other charges. This gives Anthony a return after tax of \$192 for the year.

What does the fund invest in?

This shows the types of assets that the fund invests in.

Actual investment mix	Target investment mix
 Cash and cash equivalents 100.00%	Cash & cash equivalents: 100.00%

Top 10 investments

Further information

You can obtain this information, the PDS for the scheme, and some additional information from the offer register at disclose-register.companiesoffice.govt.nz.

Notes

¹ As this fund has been in existence for less than 5 years, the risk indicator is calculated for a 5 year period using a combination of market index returns (1 July 2021 – 31 May 2022) and actual returns of the funds into which the strategy invests (1 September 2021 – 30 June 2026). The risk indicator may therefore provide a less reliable indication of the fund's future volatility.

² "**Other management and administration charges**" includes estimates of certain charges incurred in the underlying funds in which the fund invests. The estimate incorporates information provided by underlying fund managers as well as information sourced from the underlying fund's disclosure documents.
